

## Home Income Systems

# Quick Installation

Thank you for your interest in the Home Income System Website! I hope it brings you an excellent residual income for many years to come!

Here's how to install;

1. Extract all the files into a folder on your desktop
2. Right-click on the **config.php** file and choose Open With > Notepad
3. Update all the variables between the "" speech marks
  - These will be self explanatory within the text file.
4. Close and save your config.php file
5. Upload the website with its entire directory structure intact to your server. We recommend that you buy a separate domain name for your website.
6. Finish!

That's it! All you have to do now is promote your website. We highly recommend you follow the [50 video tutorials](#) on how to generate traffic to help you monetize your site.

Thank You.

Aaron Danker.
